

Ethara.AI

AGI is not born.

It is trained.

Company Induction

What is Ethara AI?

Ethara's objective is to become the most trusted partner in shaping AGI — from India, for the world.

India shapes the intelligence. Ethara builds the engine.

What We Do

RLHF

Human feedback loops that align LLMs with real preferences; helpful, accurate, safe.

SFT

Domain-specific instruction datasets that steer model behaviour and boost task performance.

Evals

Rubric-based evaluation frameworks that assess quality, fairness, and model safety.

01

Frontier Model Training

We work directly on curating datasets for training data the world's most advanced AI models.

02

Managed Workforce

We recruit and train our own AI specialists in India — full control over talent from day one to delivery.

03

Research-First Approach

Every method we deploy is grounded in benchmarking and research — from RLHF and SFT to custom rubric-based evals.

Bridging the Gap to AGI

Gurugram, India · Global Operations

Our Principles

Every decision is grounded in unwavering principles — not aspirational posters, but operational standards.

Quality First

Accuracy and precision are non-negotiable. Every output must meet the highest standard before it moves forward.

Innovation

We continuously improve our AI systems, workflows, and methodologies to stay ahead of the curve.

Customer Satisfaction

We deliver genuine value to clients — not just outputs, but outcomes that make a measurable difference.

Data-Driven Decisions

Every strategic and operational choice is backed by evidence, not assumptions or intuition.

Solution-Oriented

We focus on solving problems, not just identifying them. Ownership and proactivity are expected.

ROI-Driven Approach

We deliver measurable, quantifiable outcomes that justify every investment clients make in AI.

Our Leadership Team

Suryansh Rana

Co-Founder & CEO

Research | Technical Vision | Operations

Drives research direction, technical architecture, and operational backbone. Translates complex AI innovation into deployable, scalable systems bridging research excellence with real-world execution.

"Every AI system needs a brain."

Mahanaaryaman Rao Scindia

Co-Founder & CGO

Growth | People | Culture | Scale

Leads the Growth and HR verticals, designing the engine powering expansion across markets, clients, and talent ecosystems. From capital allocation to investor alignment and enterprise partnerships.

"The force shaping Ethara's expansion at velocity."

Shubham Garg

Co-Founder & CFO

Finance | Alliances | Capital Discipline

Oversees Finance and Business Relationships, ensuring Ethara AI operates with financial precision and strategic discipline. Responsible for managing financial planning and maintaining strong stakeholder alignment

"Every bold vision needs structural strength."

Growth Team

Subham Gorai

Sr. Manager, Growth

subham.gorai@ethara.ai

Sagar Gupta

Sr. Lead, Growth

sagar.gupta@ethara.ai

Ridhima Namdev

Sr. Analyst, Growth

ridhima@ethara.ai

HOW THE GROWTH TEAM CAN HELP YOU

Career Development

Supporting your professional growth and connecting you to opportunities within and beyond the internship program.

Performance Tracking

Monitoring intern performance and recognizing high achievers for advancement and long-term opportunities.

Project Leads

Vanshika Juneja

Project Lead

vanshika.juneja@ethara.ai

Piyush Tomar

Project Lead

piyush.tomar@ethara.ai

Shreya Agrawal

Project Lead

shreya.agrawal@ethara.ai

Samarth Dubey

Project Lead

samarth.dubey@ethara.ai

HOW YOUR PROJECT LEAD CAN HELP YOU

Task Assignment

Assigns daily tasks with clear instructions and acceptance criteria.

Quality Review

Reviews your completed work and provides structured, actionable feedback.

Performance Guidance

Helps you understand expectations and improve your output quality.

Escalation Support

Acts as your point of contact for task-related questions and blockers.

Objective of this Internship

Designed as an AI training community experience, combining shared learning, practical exposure, and core fundamentals to help you contribute effectively to real-world AI projects.

01

Write Structured Prompts

Craft well-reasoned prompts with clear justifications and intent that guide AI systems effectively.

02

Evaluate Professionally

Assess AI outputs with precision, structure, and dimension discipline using evidence-based frameworks.

03

Deliver Consistent Results

Maintain high-quality, reliable output across all assigned tasks to production-grade standards.

Each module prepares you with the skills and confidence to take on real-world, data-driven work environments.

Your Role as an Intern

You're building impact with every action. Your work directly enhances performance and helps shape smarter, more capable systems.

Work on AI Data & LLM Tasks

Execute real tasking assignments including prompt writing, evaluation, annotation, and dataset curation using professional tools and workflows.

Follow Strict Quality Standards

Every output must meet Ethara's quality benchmarks. Accuracy, completeness, and consistency with proper justification are mandatory.

Collaborate with Reviewers

Work closely with quality reviewers who will provide structured feedback to help you improve continuously throughout the program.

Deliver Tasks on Time

Meet all deadlines with high-quality work. Time management and professional communication are core expectations from day one.

Your work directly impacts AI model performance — treat every task as a production-grade deliverable.

How your work impacts model training & accuracy.

BAD TRAINING DATA — Garbage In = Garbage Out

Incorrect Datapoints

Small errors can heavily distort results

Outliers & Noise

Break patterns and reduce model stability

Data Imbalance & Bias

Leads to unfair, inconsistent outputs

Poor Generalization

Model fails in real-world scenarios

Wrong or Biased Inputs

Flawed predictions and corrupted learning

GOOD TRAINING DATA — Clean In = Reliable Out

Clean & Accurate Data

Ensures correct pattern learning and reliability

Relevant & Consistent Datapoints

Stable and reliable model performance

Handled Outliers & Noise

Clear trends and better predictions

Balanced Dataset

Fair, unbiased, and robust outputs

Strong Generalization

Performs well in real-world applications

Every data point that you provide contributes to putting India into Global frontier model training map.

Team Structure & Workflow

TEAM HIERARCHY

Project Lead

Assigns tasks, sets priorities, defines quality benchmarks, and oversees overall project delivery.

Quality Reviewer

Reviews completed work, provides structured feedback, and approves outputs before final submission.

Intern

Executes assigned tasks with precision, incorporates feedback promptly, and delivers consistent results.

THE WORKFLOW CYCLE

01

Task Assignment

Project Lead assigns tasks with clear instructions and acceptance criteria.

02

Task Execution

Intern completes the task following all guidelines and quality standards.

03

Quality Review

Reviewer assesses output against defined dimensions and benchmarks.

04

Feedback & Revision

Structured feedback provided; intern revises and strengthens output.

05

Final Submission

Approved output submitted and logged as a completed deliverable.

TYPES OF WORK

EVALS & Generalist Projects

EVALS (Evaluation)

Your role is that of an objective Quality Analyst.

- Compare two or more AI-generated outputs side by side
- Rate individual responses against structured quality dimensions
- Write detailed, evidence-based justifications for every rating
- Apply consistent scoring across all assigned evaluations

Generalist Projects

Generate and structure content for AI training.

- Create well-structured, clear, and targeted prompts
- Write accurate and informative content descriptions
- Annotate data across text, image, audio, and video modalities
- Ensure all outputs meet formatting and accuracy standards

Key Mindset: *In EVALS, you are a precise, evidence-based quality analyst. Objectivity is your most important tool.*

Evaluation Dimensions

Six core dimensions form the backbone of Ethara's evaluation framework. Apply all six consistently.

1 Instruction Following

Did the output meet all stated requirements? Correct format, constraints respected, no unwanted content added?

2 Quality

Assess clarity, grammar, composition, tone, and overall production value appropriate to the modality.

3 Accuracy

Are all facts, figures, and claims verifiably correct? Factual errors are always a major issue.

4 Naturalness

Does the output feel human and authentic? Flag robotic text, distorted images, or unnatural responses.

5 Completeness

Has the output addressed all parts of the request without omission or truncation?

6 Helpfulness

Does the response genuinely serve the user's need and deliver practical, usable value?

Rating System & Decision Priority

RATING OPTIONS

Response A is Better

A clearly outperforms B in quality and accuracy.

Response B is Better

B clearly outperforms A in quality and accuracy.

Both Good

Both meet the standard; either would be acceptable.

Both Bad

Neither response meets the minimum quality standard.

Tie

Genuinely equal outputs — use sparingly and only when truly justified.

DECISION PRIORITY ORDER

1st

Instruction Following

Always check this first. A response that ignores instructions fails regardless of quality.

2nd

Accuracy

Factual errors are disqualifying. Check correctness before assessing style or tone.

3rd

Major Issues

Severe errors — missing content, wrong format, critical omissions — override quality differences.

4th

Quality

Only assess grammar, style, and composition after all higher-priority dimensions are evaluated.

How You Will Be Evaluated

Quality Matters

Submissions must be accurate, complete, and human-generated. Ensure all instructions are followed carefully and responses reflect genuine effort. No shortcuts or AI-generated work will be accepted.

Justification

Write a clear, concise justification in natural, human-written language that explains your reasoning using specific observations (such as visual quality, accuracy, and key differences), avoids generic or templated phrasing, and clearly supports why one response is better than the other.

Average Handling Time

Candidates must strictly adhere to the defined AHT per task as specified in each project. Consistently exceeding or falling short of the expected AHT may indicate inefficiency or inactivity/being idle.

Client Flagging Policy

Any form of client flag, including idle flags, quality concerns, LLM usage, or any suspicious activity will be treated with zero tolerance. Such flags may lead to immediate review and can result in direct offboarding from the program.

Rating-Based Evaluation (1-5 Scale)

1

Not Acceptable

Output is completely off-target, missing, or violates guidelines.

2

Below Expectations

Significant errors or gaps; requires major revision.

3

Meets Expectations

Acceptable work with minor issues; room for improvement.

4

Good Quality

Strong output with only small refinements needed.

5

Excellent

Exceeds standards; accurate, thorough, and well-reasoned.

Ethara's Workplace, Culture, and Compensation

Workplace Expectations & Culture

Own Your Work

Meet deadlines, plan ahead, and communicate early if needed. Be reliable; your team should be able to count on you.

Communicate with Impact

Speak clearly, respectfully, and confidently. Keep your team informed - no surprises

Grow Every Day

Accept feedback with a positive mindset. Act on it quickly and continuously improve.

HOW YOU SHOW UP MATTERS

- Be polite, approachable, and easy to work with, build a friendly and collaborative environment.
- Follow lunch break guidelines responsibly (1:00 PM – 2:00 PM)

- Respect work timings (10:00 AM – 7:00 PM) and take permission before leaving
- Mark biometric attendance daily to ensure smooth stipend processing.

Professionalism is not just about skills — it's about how you show up and treat the people around you every day.

Stipend & Payout Structure

PAYMENT TERMS

Stipend is applicable for the days worked.

Compensation is calculated based on actual working days (excluding Sundays and National Holidays)

The stipend will be paid on the 7th of every month.

ELIGIBILITY STRUCTURE

KPI Criteria

Quality and Productivity are the primary KPIs. Interns must complete a minimum of 4 productive hours per day to be eligible.

Payout Calculation

Stipend will be calculated on a pro-rata basis.
 $\text{Days Present} \times \text{Per-Day Stipend Amount}$

Attendance Finalization

The attendance will be locked on 10th, 20th and 30th/31st of the month

Submissions flagged for LLM misuse will be automatically offboarded from the internship.

Induction Steps

01

Biometric Registration

Register your attendance biometrics for daily tracking. This must be completed on your very first day to ensure stipend eligibility.

02

HR Compliance Documentation

Complete Form 11. This form is the declaration for PF exemption. Submit your Aadhar card and PAN card copy along with this form

03

Contract & Identity verification

Review your internship contract thoroughly to verify all details and ensure accuracy. Confirm your identity (Aadhaar) to complete your onboarding with Ethara AI.

04

Floor Tour

Get familiar with your workspace, team members, and key facilities. Knowing where everything is sets you up for a smooth start.

Human Resources

Usha Pandey

Head HR

usha.pandey@ethara.ai

Pujita Bhuyan

HR Manager

pujita.bhuyan@ethara.ai

Aashima Aggarwal

HR Manager

aashima.aggarwal@ethara.ai

HOW YOUR HR CAN HELP YOU

Onboarding Support

Full setup from day one — docs, access, introductions.

Policy Guidance

Clarifying company policies, leave, and HR-related questions.

Ongoing Check-ins

Consistent point of support throughout your internship.

Conflict Resolution

Confidential, supportive channel for concerns and guidance.

IT Helpdesk

Hukum Singh

IT Head

hukum@ethara.ai

Pawan Kumar

System Admin

pawan.kumar@ethara.ai

HOW IT HELPDESK CAN HELP YOU

Asset Management

Handles allocation and tracking of all work equipment and system resources assigned to you.

Technical Support

Resolves hardware, software, and connectivity issues to keep you productive and unblocked.

System Access

Sets up and manages your system credentials, tools, and platform access from day one.

Bridging the gap to AGI.
